

## Wireless Backup Internet Service

### HIGHLIGHTS

Protection against network disruptions with immediate and seamless failover

Diverse connectivity options independent of wireline services

Continuity of business-critical applications

Faster, More Reliable 4G/LTE Wireless Services

Industry-leading SLAs

Nationwide footprint

24/7/365 business-class customer care

## Wireless Backup Internet service provides the diverse connectivity businesses need to run without interruption

Whatever the disruption – natural or man-made, your business cannot afford to stop because your employees can't communicate or process transactions. Although Internet service disruptions are inevitable, the good news is that you can safeguard your business against them. By relying on Global Capacity Wireless Backup service, you gain a resilient, continuous connection to access your data, support your applications, process your transactions, and serve your customers in the event your primary connection is interrupted.

**BUSINESS CONTINUITY AND DISASTER RECOVERY.** Global Capacity Backup Wireless with managed failover automatically detects access issues with primary data connections and immediately switches to an alternate wireline connection or a secure wireless broadband service to keep your business operational.

**NO-TOUCH MANAGEMENT.** Global Capacity deploys all the necessary equipment and configures the managed failover service, then manages and monitors the network to ensure it is working for you. Automatic failover instantly switches to wireless backup service and back to primary access as soon as the primary service is restored.

**GREATER PEACE OF MIND.** When the wireless back up with failover service is present, Global Capacity proactively monitors the status of your network connections 24/7/365 to minimize the mean time to restore your primary connectivity should an issue arise.

#### **About Global Capacity**

Global Capacity is the leading connectivity as a service company that improves the efficiency and reduces the cost of data network services globally. Through its One Marketplace, the company brings together customers and suppliers through automated platforms that provides ubiquitous network solutions delivering on its brand promise of Connectivity Made Simple. Global Capacity delivers its innovative solutions to telecommunication carriers, managed service providers, system integrators, and enterprise customers globally.
